

Ian Miller

Software Engineer and Developer

Email: indmillr@gmail.com | LinkedIn: <https://www.linkedin.com/in/indmillr/>

SUMMARY

Dedicated software developer with expertise in frontend development, specializing in creating sleek, responsive user interfaces (UI). Proficient in JavaScript, TypeScript, and Next.js, I solve complex problems with clean, efficient code. My focus is on developing scalable, performant, and user-friendly web applications. I have a knack for design and the ability to obsess over every pixel.

SKILLS

- Software Design, Full-Stack Development, UI, Communication, Problem-Solving, Mentoring, Management, Agile Methodologies, Software Development Life Cycle (SDLC), Continuous Integration (CI), Git, API Consumption, Learning Management Systems (LMS)
- **Languages:**
 - JavaScript, TypeScript, PHP, SQL
- **Frameworks & Libraries:**
 - React, Next.js, Node.js, TailwindCSS
- **Databases:**
 - MS SQL Server, PostgreSQL, MongoDB

EXPERIENCE

Lead Developer (EHR - Healthcare) | Health Solutions | Pueblo, CO | 12/25 - Present

- Function as a leader by example in continual pursuit of iterative CI/CD development approach
- Facilitate growth from a position of leadership of a team of 4 junior developers.
- Enhance custom EHR system through frequent 1:1 interaction with internal leadership and stakeholders.

Developer (EHR - Healthcare) | Health Solutions | Pueblo, CO | 03/25 - 12/25

- Maintain, support, and enhance custom EHR system according to user requirements (PHP, JS).
- Provide data reports and visualizations to stakeholders and leadership (SQL, SSRS, PBI).
- Consistently meet deadlines according to state regulations and product owner expectations.
- Adhere to Agile methodologies and spearhead the momentum of development velocity within a highly iterative CI/CD pipeline.

Senior Full-Stack Developer, Owner | SOLVR | Nixa, MO – Remote | 03/25 - Present

- Comprehensive, full-service software solutions.
- Offering services and consultation in areas of custom websites, web applications, and general responsive UI design.

Technical Trainer | Next Level Solutions | Springfield, MO | 01/23 – 04/25

- Design, develop, and maintain internal tools and custom applications using Next.js and TypeScript, including detailed documentation and LMS content.
- Engineer web solutions to improve cross-departmental workflows, leveraging custom APIs, React components, and UI libraries for enhanced efficiency.
- Automate code translation and data processes, developing secure Next.js endpoints to integrate browser UI with custom scripts.
- Deliver specialized training on the Duck Creek platform, focusing on C#, OOP, XML, API consumption, and SQL to equip developers with essential skills.

PROJECTS

- **Innovate Portal** - Participated in building an internal tools portal, integrating AI elements throughout. This included a custom AI chatbot for user support, general staff use, and as a liaison to acclimate new developers into the codebase and development environment to increase efficiency. This was built using Next.js, TypeScript, and TailwindCSS and leveraged the MS Teams tenant for including the custom AI component.
- **DocuVendor** - Designed and Developed a custom internal training tool that functioned as a static documentation hub for use by the training department to create and maintain training collateral of various media types. This was built with Next.js, TypeScript, and TailwindCSS and included custom APIs that allowed integration into the internal AI chatbot to allow users to query the documentation through the chatbot interface and receive relevant documentation in response.

CERTIFICATIONS

- **Responsive Web Design** | freeCodeCamp
- **Front End Development Libraries** | freeCodeCamp
- **JavaScript Algorithms and Data Structures** | freeCodeCamp
- **Relational Database** | freeCodeCamp
- **Junior Programmer (C#)** | Unity
- **VR/AR Development (C#)** | Unity
